**DETAILED ACTION**

Claims 1-50, 52 and 53 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 51 and 54-56, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on December 10, 2004 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double

patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian C. Remy on April 26, 2006.

The application has been amended as follows:  
Cancel **claims 54-56**.

The following is an examiner's statement of reasons for allowance: upon reconsideration, the instant invention is allowable since Hulin et al. (the primary reference) would not lead one skilled in the art to

prepare specie having the substituents embraced by the instant  $R^1$  variable. Every specie prepared and disclosed in Hulin et al., that are closest to the structure of the compounds of instant formula (I), has a phenyl ring attached to the 2-position of the oxazole ring. In contrast, a "phenyl" ring is not embraced by the definition of the instant  $R^1$  variable. Further, the phenylene ring in Formula (II) on page 6 of Hulin et al. is unsubstituted at every other position than the 1,4-linkage whereas the phenylene ring in instant Formula (I) must be further substituted in addition to the 1,4-linkage as required by the proviso under the definition of instant variables  $R^3$ ,  $R^4$ ,  $R^5$  and  $R^6$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
